Coming Up in May or June

Himalayan Balsam 'bashing' - we have several areas contaminated with this non-native weed which is known to overwhelm our own native plants.

Depending on spring growth, we will be organizing groups to pull it out throughout the summer. Dates to be published on notice boards, Nextdoor Read, and REG Facebook page.

Visiting Speakers - when life is more 'normal' we will resume inviting visiting speakers on environmental matters, at the Village Hall, East View.
