

CCTV Community Portal

If you have CCTV cameras and register with the Lancashire Constabulary Community Portal, you will help us deter and solve crimes quicker.

By registering your cameras with the Community Portal you will streamline the information exchange, making it easier for us to identify which of your cameras may have evidential footage and will simplify the processing of making it available to the Investigating Officer.

The service is free of charge and entirely voluntary. By registering with the portal you are not giving Lancashire Constabulary access to your CCTV system, you are making it easier for us to request and collect footage we may require in an investigation – the only footage we will ever have access is the footage you send to us.

if you would like to register your cameras please follow the link below.
